

Baby Driver Chords by Simon & Garfunkel

Capo on 1st (chords relative to capo)

In main riff in Intro and Verses : in D lift and replace the 1st and 2nd fingers (A & F# notes), alternating between D and G6/D. The strumming pattern is pretty quick so I strongly advise listening to it first.

In outro : Play a barred A shape at the 7th and lift off in the same timing as the main riff.
